# 35 Structured Literacy Kits

Structured Literacy Kits

A complete programme for  
reading, spelling and handwriting.

[www.dyslexikit.com](http://www.dyslexikit.com)

**For your child the dyslexikit programme will:**

- ▶ build literacy skills and strategies systematically and incrementally,
- ▶ promote active and enthusiastic involvement of the pupil,
- ▶ include activities that develop phonological awareness, memory, speaking and listening skills,
- ▶ raise self-esteem and increase confidence.

**For parents and teachers the dyslexikit programme will:**

- ▶ combine and develop all three elements of reading, spelling and handwriting simultaneously,
- ▶ give detailed instructions telling you what to teach and how to teach it for success,
- ▶ help tackle under-achievement and improve 'value added' in key areas,
- ▶ reduce the time needed for preparation of materials to meet the diverse needs of children with literacy difficulties,
- ▶ support parents and professionals working together.

Dyslexikits contain specific and detailed teacher instructions on each left-hand page of the books with accompanying pupil worksheets on the right-hand page.

Every skill taught builds on work covered in earlier kits.

Packed with ready-made, full colour, lively worksheets.

CDs are available for printing out every worksheet.

Exercise books, blank cards and envelopes for reading and spelling routines are available.
